

DPS Abstract (DPS 2000, Pasadena Convention Center)

Preliminary Results of DPS EPO Survey

E. D. Miner (JPL/Caltech), L. A. Lebofsky (Univ. of Arizona)

With the increased emphasis on scientist involvement in Education and Public Outreach (EPO) efforts, the DPS Committee decided to conduct a survey on present EPO efforts by its membership, as well as proffering the services of a NASA support network to facilitate increased, or more "leveraged," involvement in EPO. This talk will summarize the results of that survey, which was distributed through the DPS mail exploder and the DPS Home Page.
