

Tropical Ocean Global Atmosphere CD-ROM Set

C. Finch (Jet Propulsion Laboratory, California Institute of Technology,
Pasadena, CA 91109; 818-354-8032; internet cjf@shrimp.jpl.nasa.gov)

Demonstrations of a set of Compact Disks-Read Only Memory (CD-ROMs) and accompanying software available from the Jet Propulsion Laboratory Physical Oceanography Distributed Active Archive Center. The CD-ROMs contain 15 data sets that, together, meet most of the Tropical Ocean Global Atmosphere project data requirements. Data sets include parameters from the Basic Surface, Basic Upper Air, and Supplementary data sets from the European Center for Medium Range Weather Forecasting model; monthly analyzed sea surface temperature fields and climatology-mean monthly fields from the NOAA Climate Analysis Center; monthly average cloud, atmospheric, and surface properties from the international Satellite Cloud Climatology Project; precipitation data from the Global Precipitation Climatology Project; surface marine observations from Voluntary Observing Ships compiled by the United Kingdom Meteorological Office; and several more.

The software distributed with the CD-ROM set allows the user to browse the data on an IBM-PC (or compatible) and view and extract the data of interest.
